

Edith Speers was born in Canada and migrated to Australia in 1974. Her educational background is in Science, but writing in general and the English language in particular have been her obsessions since childhood. Since 1975 she has resided on a rural property in southern Tasmania. Although her work has won many literary prizes and her poetry has been published in all the major magazines and anthologies of the past twenty years, only one collection of verse has been published and it is no longer in print. The appearance of this volume has been a long-awaited literary event.
